RECORD TYPE 30 – THIRD PARTY PAYER

- Required for all claims, up to 4 records per claim.

- At least one third party payer record (record type 30) must appear in the claim for each payer involved in the bill. The Uncompensated Care Pool (UCP) may have two records.

- There must be at least one Record Type 30 with a UCP Payer Id (**143** and/or **990**) included in each claim.

- The order of Sequence numbers assigned to Payer records indicates which payer is primary, secondary, or tertiary.

- In the following example, the Uncompensated Care Pool (UCP) is the tertiary payer. If there are no other payers, the UCP record should be assigned Sequence 01.

Payer	Record Type Code	Sequence Number
Primary Payer	30	01
Secondary Payer	30	02
Uncompensated Care Pool (Free Care Services)	30	03
Uncompensated Care Pool (Free Care - Co-pay, Deductible, or Co-insurance)	30	04

- **For the UCP record(s), the DHCFP Payer Codes are:**

Payer Code	Payer Name	Charges to include in Record
143	Free Care Services	Charges for services which the provider is submitting to the UCP.

    AND/OR

990	Free Care – Co-pay, Deductible, or Co-insurance	Patient Co-pay, deductible, or co-insurance charges which the provider is submitting to the UCP.

01	Auto accident		Code indicates the date of an auto accident. This code is used to report an auto accident that involves liability insurance.	
02	No-Fault Insurance Involved – Including Auto Accident/Other		Code indicates the date of an accident, including auto or other, where the State has applicable no- fault or liability laws (i.e., legal basis for settlement without admission or proof of guilt).	
03	Accident/Tort Liability		Code indicates the date of an accident resulting from a third party's action that may involve a civil court process in an attempt to require payment by the third party, other than no-fault liability.	
04	Accident/Employment Related		Code indicates the date of accident relating to the patient's employment	
05	Other Accident		Code indicates the date of an accident not described by the above codes. This code is used to report that the provider has developed for other casualty related payers and has determined there are none. (Additional development not needed.)	

VI.b)   Type of Bill

VI.b) Record Type '40': Claim Data – Occurrence: Type of Bill				
RT	**Field**	**R?**	**Field Name**	**FL#**
40	4.0	R	Type of Bill	FL04

Definition
This three-digit alphanumeric code gives three specific pieces of information. The first digit identifies the type of facility. The second classifies the type of care. The third indicates the sequence of this bill in this particular episode of care. It is referred to as "frequency" code.

1st Digit	**Type of Facility**	
1	Hospital	
2	Community Health Center	
3	Hospital-based Community Health Center	
2nd Digit	**Classification**	
1	Inpatient	
3	Outpatient	
3rd Digit	**Frequency**	**Definition**
1	New Admit-Through-Discharge Claim	This code is used for a bill encompassing an entire inpatient confinement or course of outpatient treatment for which the provider expects payment from the payer. **New claims must have a unique TCN**.
3	Interim, Continuing Claim	Use this code to indicate this bill is for a continuing Inpatient stay where the patient is still an inpatient. **The Interim code may also be submitted for Outpatient claims for Home Care Services only.** **Interim claims must have a unique TCN.**
5	Late Charges Only	Use this code to indicate this bill is for late charges to be applied to a previously submitted bill. **Late Charges claims must have a unique TCN.**

VI.b) Record Type '40': Claim Data – Occurrence: Type of Bill		
7	Replacement of Prior Claim	This code is used by the provider to resubmit a previously submitted bill. This is the code applied to the corrected bill.
		The resubmitted claim must have the same TCN as the original claim.
		The resubmitted claim must have the same UC Write Off Date as the original claim.
		Use replacement claims for previously submitted claims which fail edits.
		Do not use replacement claims to resubmit previously accepted claims if the charges are being adjusted.
		Do not use a replacement claim in combination with a void claim when correcting a bill.
8	Void/Cancel of a Prior Claim	Use this code to indicate a bill/charge is an exact duplicate of an incorrect bill/charge previously submitted.
		The voided claim must have the same TCN as the original claim.
		The UC Write Off Date must be the month and year the recovery is made and reported on the UC form.
		The sum of UC Charges on '30' Records for DHCFP Payer Identification codes 143 and 990 must match those in the claim to be voided.
		A void claim may be used in combination with a new claim in order to correct charges.

File Submission Rules

This section will be expanded in a later version of this document.

File Format

Text file containing 192-character rows.

Data Transmission Media Specifications

The Division's goal is to collect claims data via a Virtual Private Network (VPN). However, at this time the state is just beginning the implementation of its VPN network and is not yet prepared to offer it as a data transmission option. As an interim measure, the Division will collect the information on any one of the media types described below. Providers are required to notify the Division of the media type and submit test information to verify compatibility and format. This testing and certification must be completed for each provider prior to scheduled data submissions.

Compact Disk:

A Compact Disk (CD) with a total capacity of 650 megabytes is the standard format accepted. CD-R and CD-RW are also acceptable formats as long as the CDs themselves have been closed (no more data can be added to them).

Zip Disk:

An Iomega Zip Disk with a total capacity of either 100 megabytes or 250 megabytes is the standard format accepted. The Division is equipped to handle either of these Zip Disk formats.

*DAT Tape:

A 4mm (Digital Audio Tape) cartridge with a total capacity of 4.0 gigabytes is the standard format accepted.

*DLT Tape:

A _" (Digital Linear Tape) cartridge with a total capacity of 35 gigabytes (uncompressed) and 70 gigabytes (compressed) is the standard format accepted.

*Software Supported

- Veritas – Backup Exec 8.0

- Microsoft – NT Backup 4.0

- Iomega – 1 Step Backup/Restore

Submission Acceptance Rules

Files will undergo a series of record checks or edits at the record and field level. The data will be edited for compliance with the edit specifications set forth in this document. Failure of these edits will cause a File or a Claim to fail. Any of these items, if failed, must be resubmitted in full.

File Level Edits

Files with any missing or failed records of Record Types 01, 10, 95 or 99 must be resubmitted in full.

Record Level Edits

Records with incorrect format, or with any fields that fail edits, will be considered failed records. Certain errors will not cause a record to fail, but will be reported in the remittance advice.

Records must have the following format:

♦   192 character row.

Claim Level Edits

All errors will be recorded for each claim. A claim will be rejected from the data file for any failed fields/records. Claims with any failed records in Record Types 20-90 must be resubmitted in full.

Electronic Claims File Summary Report

An Electronic Claims File Summary Report will be returned to Providers, outlining file summary information and individual claim edit information.
